**Notes:**

Crossbar spacing and the vehicle's wheelbase length will dictate the ladders that can be carried.

Crossbars can be spaced at five, six, seven, or eight feet.

A 3<sup>rd</sup> crossbar can be spaced four, five, six, or seven feet.

If carrying a long extension ladder and a short step ladder, a three crossbar rack is suggested.

Contact Prime Design customer service for application specific questions.

Check the vehicle manufacturer's recommendation for roof capacity weight limits.

A wide range of accessories are available including conduit carriers, light holders, and more.
